My apologies Bill for the late hour notification. We issued our final UIC permits today and just finished posting our permit documents to our website at this address:

<https://www.epa.gov/uic/epa-dewey-burdock-class-iii-and-class-v-injection-well-final-area-permits>

We appreciate the support your team has provided EPA to get us to this point.

Sincerely,

Douglas

I think you said it is a close hold but my Division Director has these questions;

When will see the permit? Are they going to share it before they issue it.

I agree with Bill. They look fine.

Thanks so much.

These seem fine but I want Elise to take a quick look and she is out until later this afternoon.

Hi Bill: as of this morning, we are still on track for final permit issuance by COB tomorrow.

I also wanted to share the version of NRC/EPA's Qs and As we included in our Communications Strategy should questions come up from external stakeholders after tomorrow. These are essentially similar to what I sent you previously (see attached) but appear as three rather than four sets of talking points (see below).

Let me know if NRC is still ok working from these to address questions you receive regarding EPA's vs. NRC's roles:

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Thanks,

Douglas

Hi Bill: after checking back in with our senior leadership, we are now expecting to issue our final permit decisions by Tuesday, November 24th.

Thanks,

Douglas

Hi Bill: my apologies for not being back in touch sooner.

It looks like we are now shooting for a final permit issuance date of 11/13/20. I hope to give you an update again next week should this date slide further.

Douglas

So far we are fine with what you developed. Any additional information about the permit?

Ex. 5 Deliberative Process (DP)

By way of an update, we now expect our permits to be issued some time in the last half of October.

My apologies for not following up sooner,

Douglas

Will do. Once have we consensus at our level, I will need to share with a few other EPA folks before we finalize.

DELIBERATIVE

Hi Bill: the date of permit issuance continues to be a moving target. At this point, we are looking at the first half of October as we still need to complete some tribal consultation work. This information is a close hold for now.

Let me know if you/Elise want to take the initial cut at these Q &As/TPs or if you prefer EPA do so.

Thanks,

Douglas

My understanding was some Q and A's or talking points that we can work on together. When is the permit scheduled to be signed?

Thanks

Greetings Bill and Elise: I understand that John and Greg had a chance to talk after our call on September 3rd. The one action item I received from my management was to work with you to develop some joint talking points related to our respective regulatory roles to help ensure we are aligned in responding to inquiries from outside parties including our state regulatory partners, industry, and applicants (e.g., Powertech).

Please let me know if this is your understanding as well. I would be happy to work with you directly in drafting these talking points.

Thanks,

Douglas
